Multidisciplinary & Graphic Designer with 6+ years of experience spanning visual identity, UX/UI, editorial and creative technology.

Works with both large digital products and independent cultural projects — combining strong visual direction with systems thinking and contemporary digital aesthetics. Practice explores the intersection of interfaces, storytelling, internet culture and experimental visual systems.

Every project begins with research, positioning and visual analysis to build scalable and emotionally expressive design systems. Especially interested in combining branding, interface design and AI-assisted creative workflows.

## Education

Bachelor Degree in Philology

Self-taught in visual design, UX/UI, branding, creative technology, AI-assisted workflows and digital product design.

## Languages

English — Intermediate  
Russian — Native
